Intercontinental Terminals Company

is proud to participate in the American Chemistry Council

Responsible Care® Partnership Program

We pledge to operate our business according to the following

Guiding Principles

Chemistry is essential to the products and services that help make our lives safer, healthier and better. Through the Responsible Care initiative and the Responsible Care Global Charter our industry has made a worldwide commitment to improve our environmental, health, safety and security performance. Responsible Care establishes a framework to drive safety and sustainability and commits organizations to a common set of principles. Accordingly, we believe and subscribe to the following principles:

o To lead our companies in ethical ways that increasingly benefit society, the economy and the environment.

o To design and develop products that can be manufactured, transported, used and disposed of or recycled safely.

o To work with customers, carriers, suppliers, distributors and contractors to foster the safe and secure use, transport and disposal of chemicals and provide hazard and risk information that can be accessed and applied in their operations and products.

o To design and operate our facilities in a safe, secure and environmentally sound manner.

o To instill a culture throughout all levels of our organizations to continually identify, reduce and manage process safety risks.

o To promote pollution prevention, minimization of waste and conservation of energy and other critical resources at every stage of the life cycle of our products.

o To cooperate with governments at all levels and organizations in the development of effective and efficient safety, health, environmental and security laws, regulations and standards.

o To support education and research on the health, safety, environmental effects and security of our products and processes.

o To communicate product, service and process risks to our stakeholders and listen to and consider their perspectives.

o To make continual progress towards our goal of no accidents, injuries or harm to human health and the environment from our products and operations and openly report our health, safety, environmental and security performance.

o To seek continual improvement in our integrated Responsible Care Management System® to address environmental, health, safety and security performance.

o To promote Responsible Care® by encouraging and assisting others.
